Mission

Advises and invests in the next generation of NGOs through a nonprofit investment bank and a for-profit impact venture arm, connecting donors, mission-driven organizations, and purpose-driven founders with global capital.

Vision

A world where every mission-driven organization has the capital, rigor, and partnership it needs to turn purpose into measurable, lasting impact.

inlightenup Services

Advisory Service

We help founders and boards architect mission-aligned strategy from theory of change to operating model so capital and conviction move in the same direction.

Capital Raise

We connect ventures to a curated network of donors, family offices, and impact investors, structuring the right instruments, grants, equity, and blended finance for the work to mature.

ImpactIQ

We instrument outcomes from day one. ESG-grade reporting, programmatic data, and audit-ready dashboards turn philanthropy into infrastructure.

Why Ventures Stall

Ventures stall when the structure, the people, and the mindset behind them are not aligned with the mission.

WHERE VENTURES BREAK DOWN

Capital Spent, Mission Starved

Operating expenses run high while the mission itself is underfunded. The venture burns runway on overhead without building the thing it exists to deliver.

Talent Without Conviction

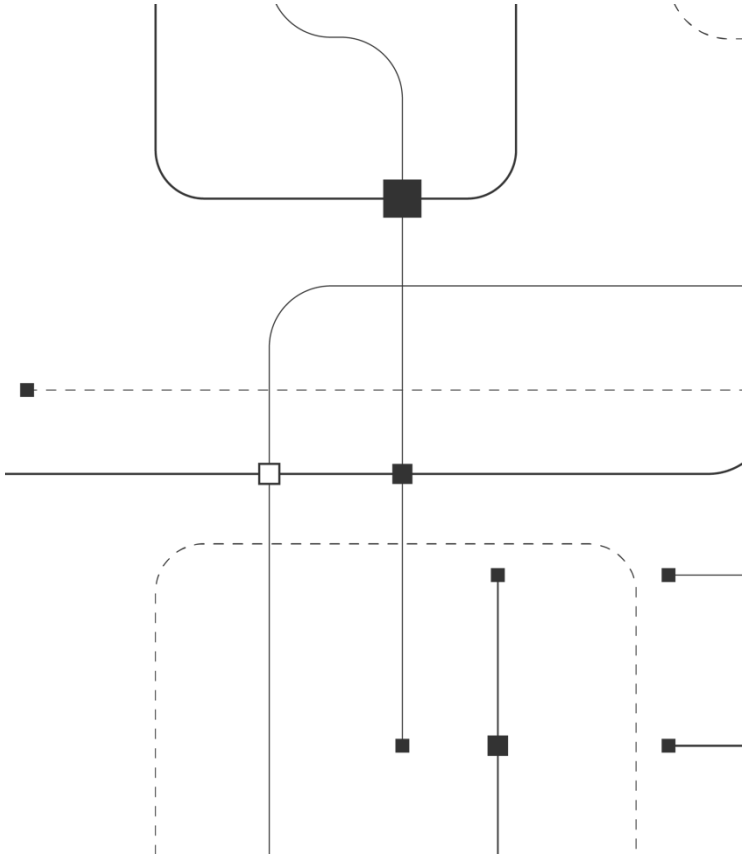

Hiring tracks skills and availability rather than belief in the mission. Execution drifts the moment the work gets hard, because no one on the team is carrying the why.

Governance Pulls Against The Mission

Boards, incentives and decision rights are built for control or convenience, not for the outcome the venture was created to produce. Decisions stall and investors pass.

Fear Of Thinking Big

Founders and teams scale their ambition to what feels safe, not to what the opportunity demands. The venture quietly settles for less and never asks for what it needs.

Process of a Project

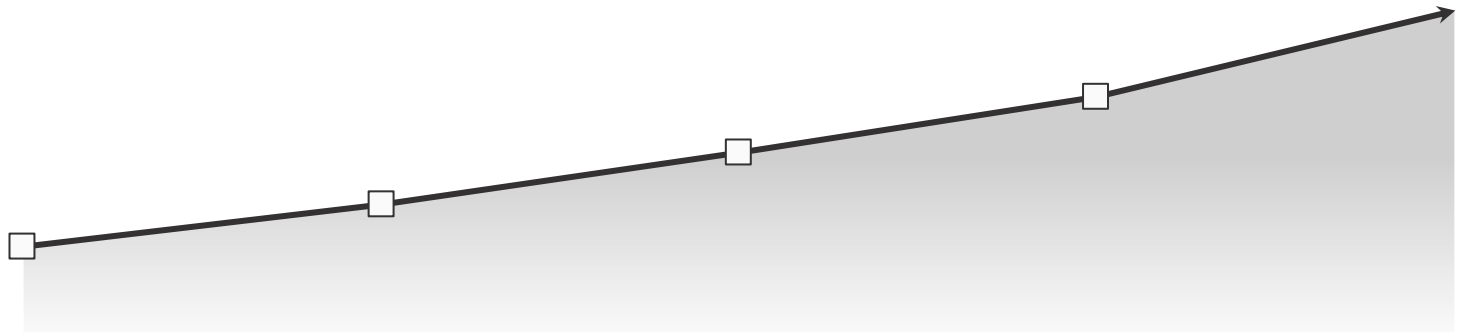

A five-stage pathway moves each entity from initial fit to operational, capital raise, and partnership ready.

THESIS

inlightenup seeds the venture by building the structure before telling the story. A twelve-month engagement that takes an idea, a founder, or an early program and delivers an impact-driven project.

"We go beyond the transactional relationship: by building trust and a healthy working partnership, we remove the resistance that stalls most ventures."

1	2	3	4	5
Pre-Screen	**Onboard**	**Define**	**Structure**	**Prove**
Top-level understanding of the company	Request all the data from the entity	Finalization of Thesis & Governance	Understanding structuring & finalizing the program & KPI	Operational, Capital Raise, and Partnership Ready
0-1 Week	**2 Weeks**	**1 - 3 Months**	**3 - 8 Months**	**9 - 12 Months**

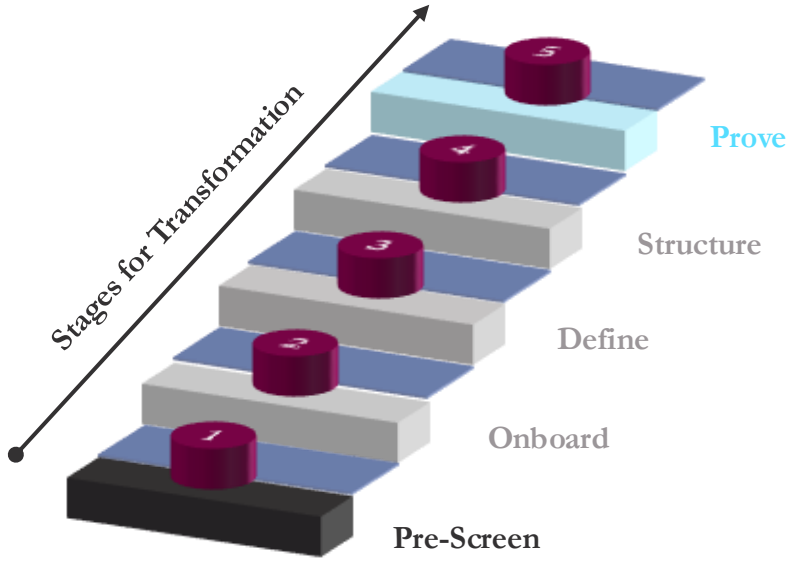

Transformation Sequence

A successful build up is never structured on the technical component alone; the emotional component must be present as well.

TRANFORMATION PROCESS

Every stage brings the entity closer to the finish line. Some stages are harder than others, so the process stops at each gate and asks the right questions before the entity moves on.

- **Gates:** Checkpoint before an entity can move on to the next step.
- **Pause Period:** When a gate does not clear, inlightenup works with the entity to identify the emotional or technical barriers holding it back before it proceeds.

UNDERSTANDING THE PROCESS

Each gate confirms that the entity is **emotionally and technically ready** for the next stage. A pathway is never built on the technical component alone.

Emotional Intelligence Understanding (EIU)
The ability to recognize, understand and address the resistance an entity shows that would otherwise pause its development.

Technical Intelligence Understanding (TIU)
The ability to recognize and teach the standards that grow the entity's structure: documents, governance, metrics and partners.

AI Makes The Whole Iceberg Visible

It automates the technical layer an entity shows above the waterline and surfaces the emotional layer beneath it that decides whether a stage clears.

ABOVE THE WATERLINE – WHAT THE ENTITY SHOWS

Technical Intelligence Understanding (TIU)

Today: A database of templates, one set per stage, is matched by hand to the stage the entity is currently on.

WITH AI

Recognizes which stage the entity is on and **deploys the right materials automatically**, so the team's time goes to the work, not the paperwork.

BELOW THE WATERLINE – WHAT THE ENTITY DOES NOT SAY

Emotional Intelligence Understanding (EIU)

Today: Weekly or bi-weekly meetings build the relationship. Every meeting is transcribed to capture the full record, and the team reads visual and auditory cues throughout to understand the entity's state of mind.

WITH AI

Transcript analysis detects shifts in tone when a topic is deferred or steered away, and produces an **EIU score** on readiness after every meeting.

Three Client Profiles

Each package fits a different starting point, from a founder with an idea to a nonprofit program.

CLIENT PROFILES

VENTURE SEEDS | EQUITY LED

Pre-revenue founders

- Idea, founder, or newly formed entity with no revenue
- Needs a thesis, governance and a model before raising

Package: $12,000 at signing + 10% equity

VENTURE SEEDS | HYBRID

Early-traction ventures

- Formed, with some funding or early revenue
- Needs structure and KPIs to scale or raise

Package: $60,000 ($5,000 a month) + 5% equity

NONPROFIT | CASH

Nonprofits and early programs

- Pre-formation or formed, no revenue
- Needs governance and a partnership-ready program

Package: $150,000 over 12 months

NOT A FIT

inlightenup turns away organizations that treat impact as a marketing line rather than a measurable outcome; no verified results, no capital. We back only the mission-driven NGOs and ventures willing to be held to the same rigor as any institutional investment.

Proof of the Method

Planting Seeds went from a working program with no structure to a funded, institutionally positioned initiative in one year.

THE CHALLENGE

Instituto Meditativos ran mindfulness sessions inside youth socio-education centers near Brasília. The program worked, and the unit director saw fewer violent responses and a falling return rate, but it lived in one facilitator, had no organizational profile, no metrics and no funding structure. Centers across Brazil were asking for it, and it could not be extended.

WHAT INLIGHTENUP DID

Wrote the grant-ready organizational profile, the program's first institutional document. Ran the public campaign in inlightenup's institutional voice and positioned the program alongside a global wellness provider, academic endowments, and the Government of Brazil. Held scope: the program was too early to absorb the Project Seed facility, so a separate entity was proposed instead.

THE RESULT

A first cohort closed, a named portfolio initiative, and a scaling model priced per facilitator placement. The program now has the profile, positioning, and unit cost that an institutional funder can diligence.

2,500

young people reached across roughly 700 sessions

$60K

places one trained facilitator in one new center for a full year

“Para dar amor, basta amar” means “To give love, it is enough to love.”

Francisca Bezerra Vale (Founder), Instituto Meditativos

What Clears Each Gate

If a stage does not clear its gate, the engagement pauses until both checks are met.

WHAT CLEARS EACH GATE

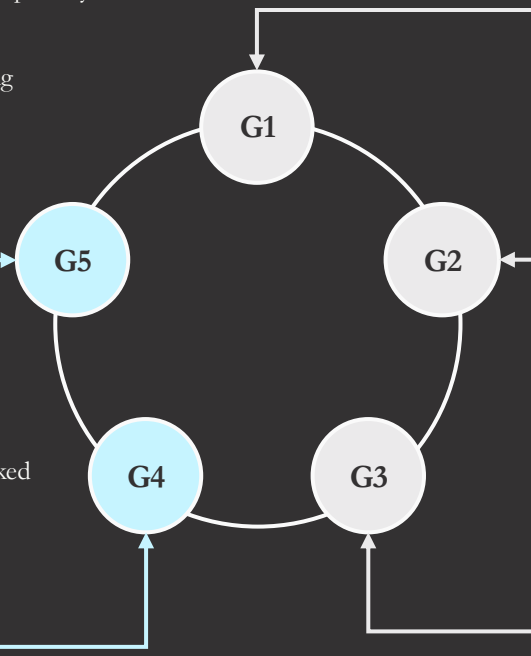

G1
- ✓ **Technical check:** Entity fits one of the three package profiles
- ✓ **Emotional check:** Founder is open to a 12-month partnership

G2
- ✓ **Technical check:** Requested data is received and complete
- ✓ **Emotional check:** Team shares information without deflecting

G3
- ✓ **Technical check:** Thesis and governance are signed off
- ✓ **Emotional check:** Leadership agrees on direction and roles

G4
- ✓ **Technical check:** Program and KPIs are in place and tracked
- ✓ **Emotional check:** Team owns the KPIs day to day

G5
- ✓ **Technical check:** Operational, capital-raise and partnership ready
- ✓ **Emotional check:** Entity runs without inlightenup steering

HOW TO START

1. **Intro call**
   A conversation about the entity, its stage, and its goals.
2. **Pre-Screen**
   inlightenup reviews fit within one week and clears Gate 1.
3. **Proposal**
   A recommended package: Equity Led, Hybrid or Nonprofit.
4. **Sign and Onboard**
   Agreement signed; the two-week Onboard stage begins.

Start with a fit conversation and let structure, readiness, and evidence earn the right to scale.

Inlightenup offers a structured twelve-month partnership for ventures ready to build before they scale
